

Tommy Penner

Senior Support Engineer (SaaS / APIs / Docs)

✉ t.penner@live.com ☎ +1 (586) 770-1839 📍 Metro Detroit, MI USA (GMT-5 / ET) 🌐 [/tommypenner](https://tommypenner.com)

Introduction

Senior Support Engineer specializing in developer tooling, REST APIs, and SaaS platforms. 14+ years of experience resolving complex technical problems for enterprise customers, driving engineering escalations to root cause, and building the internal tooling and processes that keep support operations running. Equally comfortable working in a ticket queue, updating a Postman collection, or running a curl command.

Core Competencies

REST APIs & OpenAPI/Swagger · Authentication (API keys, JWT, OAuth) · GitHub & GitHub Actions · Enterprise customer support · Cross-functional escalation & root-cause analysis · Technical documentation authoring · Contractor training & async team operations · Billing systems (Stripe) · Support infrastructure & tooling (Intercom, Zendesk)

Software and Services Experience

💬 User Support

Intercom, ZenDesk, Slack, Zoom, Loom, Screen Studio, CleanShot X, Google Suite, Notion, VSCode, Discord

🔗 Developer/SaaS Tools

GitHub, GitHub Actions, GitLab, Postman, Browser Dev Tools, MongoDB, Stripe, Cloudflare, Linear

📁 Technologies

OpenAPI, Swagger, Markdown, MDX, REST APIs, HTML, CSS, Git, Linux Terminal

Work Experience

ReadMe

Full Remote

Senior Support Engineer

June 2021 - November 2025

- Coordinated Product, Engineering, Success, and Support to migrate Enterprise customer content to ReadMe's new Git-powered platform; prevented churn of 100 Enterprise customers previously marked "At Risk".
- Managed a nine-person international QA contractor team across three time zones from pre-launch through general availability of ReadMe's Git-powered platform, identifying issues that would have caused content loss or corruption for migrating Enterprise customers.
- Managed day-to-day contractor support operations, maintaining SLA response times under 30 minutes and team CSAT consistently above 95%.
- Embedded with Engineering as sole billing SME during Stripe rollout; shaped implementation decisions, managed customer impact from dormant account charges, and recovered \$250K+ in uncollected revenue within a single quarter.
- Built asynchronous onboarding resources using Loom, Notion, and ReadMe, bringing new agents to full competency within three weeks.
- Authored user-facing documentation for product features and launches across ReadMe's entire platform, covering API reference, configuration, and end-user workflows.
- Diagnosed and resolved complex issues in user-generated OpenAPI/Swagger, Markdown, MDX, and GitHub Actions; escalated systemic problems to Engineering and Product after exhausting triage options.
- Trained contractors on troubleshooting standards and escalation paths, establishing consistent support quality across a globally distributed team.

Vimeo

Full Remote

Developer Support Manager, Core Developer Tools

September 2017 - May 2021

Technical Support Specialist, API / Mobile & TV Apps / Partnerships

- Owned all escalations for Vimeo developer tools and backend/server-side issues, reproducing API bugs in production and coordinating fixes with code owners.
- Supported Vimeo Enterprise clients and Partners on custom integrations; provided technical partner support for GoDaddy, Patreon, Zoom, and Asana, among others.
- Created onboarding resources and maintained technical documentation for Vimeo's developer tools, enabling Enterprise Sales, Client Solutions, and Tier 1/2 support teams.
- Contributed 140+ StackOverflow answers, driving 324,000+ impressions, earning 3,000+ reputation (as of November 2025).

The Yeomen

Full Remote

Vimeo Support Specialist, Mobile & TV Apps

March 2016 - August 2017

- Owned support for Vimeo mobile and TV apps, resolving user issues and inquiries.
- Served as the primary Vimeo knowledge resource for The Yeomen support team.
- Identified, tested, and reported product bugs to Vimeo engineers for resolution.

Vimeo

New York, NY // Remote

Content + Community Manager

March 2012 - March 2016

- Translated user-reported issues into actionable engineering tickets and user stories.
- Maintained internal and public support documentation of mobile web, mobile, and TV apps.
- Led functional QA for iOS and Android app releases, serving as the go-to resource for both Support and Engineering on platform behavior, user workflows, and app capabilities; maintained a physical device lab for manual validation across Android hardware.
- Contributed to Vimeo Video School and Weekend Project initiatives through article writing, script collaboration, and contest coordination; developed content ideas executed across the community team.

Education

Lawrence Technological University

Southfield, MI
